CSTAT Seminar Summer 2020

CSTAT Seminar

CSTAT presents a series of reporting guidelines developed to improve the reliability and value of published health research and animal research studies by promoting transparent and accurate reporting. Many Journals require these reporting guidelines when submitting manuscripts. Reporting guidelines are not quality appraisal tools.

Presenters are from CSTAT, Office of Research and Innovation, College of Natural Science, and the College of Veterinary Medicine.

Series Titles and Dates

1. CONSORT Statement: Randomized Controlled Trials
April 30, 2020 - Dr. Marianne Huebner
